DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

- a. Species 1 (Figs. 1-2): Claims 1-3.
- b. Species 2 (Figs. 3-4): Claims 4-6.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

2. During a telephone conversation with Mr. Edward D. Gilhooly on 16 January 2006 an election was made without traverse to prosecute the invention of figures 3-4, claims 4-6. As such claims 1-3 are withdrawn from consideration as being directed to an non-elected species.

Specification

3. The disclosure is objected to because of the following informalities:
- a. On page 2 line 8 the word "jrod" does not make sense.
 - b. On page 2 line 17 the number "14" does not make sense in that there is not reference number 14 in the drawings.
 - c. On page 2 line 18 the number "16" does not makes sense in that there is no reference number 16 in the drawings.
 - d. On page 3 lines 10-20 the reference numbers " 2' ", " 4' ", " 6' ", " 8' ", " 10' ", and " 12' " do not make sense in that these numbers are not in the drawings.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 4-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Harrison.

Harrison discloses an hollow shaft having opposite ends (6), a handle means in the form of shaft (16) and grip (20) removably affixed to one of the opposite ends of shaft (6) in the form the handle means (Ref. No. 16) can be screwed all the way to the end of shaft (6) and as such will be fixed to the end or rod (17) can be partially screwed out such that shaft (16) is removed from the end of shaft (6), elongated means being a screw (17) inserted in a hollow shaft and attached to the handle means (Fig. 4C), an elongated means being a rod with threads on the outside (17), and a rod having an end portion for preventing separation of a rod from a shaft in the form of the end portion of the rod has threads when engaged with prevent separation of the rod with the shaft (Fig. 4A).
